

Energy Transition Network

Key topics with speakers on Hydrogen, Battery Market Attractiveness and Financing the Energy Transition, CCUS, Clean Fuels, Critical Minerals and more.

Almost 600 Full or Honorary Members from 170+ organisations have joined the Network.

Regional representation: 57% Europe, 29% Asia Pacific, 10% Americas, 4% Middle East & Africa.

Nine Special Interest Groups have been formed with nearly 150+ participants overall.

IPFA About The Network

The Energy Transition Network is focused on knowledge sharing and networking for our Full, Public Sector & Solo member community, creating content for the benefit of all our members.

Virtual Network Meetings are held bi-monthly, where possible in all time zones to be inclusive of our global membership.

The Network and associated Special Interest Groups are chaired and led by members.

Meetings focus on the critical challenges of the Energy Transition, focusing on topics such as energy storage, carbon capture, and policy & regulation.

Markets

Special Interest Groups are periodically formed with the objective of member-led collaboration and discussions.

IPFA

About Special Interest Groups

Our Special Interest Groups (SIGs) focus on key aspects of the Energy Transition, led by members with a focus on producing outputs for all our community.

SIGs are small, focused working groups organised around a set of deliverables that add value and synthesize information from different perspectives.

SIGs operate on a fixed term with deadlines to deliver specified outcomes. SIGs may operate with a regional focus.

SIGs explore a specific topic or niche area of interest for the Network community. They collaborate to produce content for IPFA events and the Knowledge Hub.

SIGs are governed by the Network with SIG Chairs selected from the membership to drive activities.

Special Interest Groups Outputs

Salient Drivers of the Battery Storage Expansion across Europe

SAF – Opportunities and Risks for Investment

Carbon Ammonia Market

Facilitating the Bankability of Energy Transition Projects

Coming soon!

- Accelerating Net Zero –
 Overcoming Barriers with Govt
- Developing a Methodology for Integrating Physical Climate Risk Insights into the Investment Lifecycle
- Decarbonisation of Transport maximising opportunities for the sector throughout the transition

IPFA Feedback

Chairing a SIG is a great way to connect with a global network of infrastructure professionals from diverse backgrounds and disciplines. The SIGs serve as useful forum where individuals can share their knowledge and experience in advancing energy transition projects and share global perspectives on current policy and market trends.

Dennis Trigylidas (SAF SIG Lead), Senior Advisor, Energy Infrastructure, Fuels Sector Natural Resources Canada/ Government of Canada

Chairing a Special Interest Group is a rewarding experience that offers a unique opportunity to foster collaboration, facilitate meaningful dialogue, and build connections among infrastructure professionals. It provides a valuable platform to lead focused discussions, support shared learning, and contribute to the development of best practices and strategic insights across emerging topics.

> Charlotte Whittlesea (Climate Risk SIG Lead), Associate, ESG & Sustainability Equitix

Extend your network, share outputs with your colleagues and peers

Profile your company's participation in an industry-led initiative

Join the Energy Transition Network mailing list

Attend bi-monthly meetings led by the nominated Chair

Suggest and initiate smaller Special Interest Groups for guided discussions and outputs

Contribute to the discussion in our private LinkedIn Group
