

IPFA

A Guide to Special Interest Groups

Collaborate with global professionals to shape the future of infrastructure and energy.

About Special Interest Groups

Special Interest Groups (SIGs) are small, focused working groups organised around a set of deliverables that add value and synthesize information from different perspectives.

- Explore a specific topic or niche area of interest for the IPFA community.
- Offer a unique opportunity to collaborate with other members on a global basis to produce content for IPFA and the Knowledge Hub.
- Work on a fixed term (4-5 months) with deadlines to deliver specified outcomes.
- Present back your findings with white papers, events or webinars based on your content.

Leading a Special Interest Group

- Chair online meetings on a monthly basis for a 4-5 month duration.
- Appoint a Co-Chair so that all regions can be covered (from your organisation or another IPFA member).
- Collaborate with other members by sharing experiences, lead focused discussions, share learning and develop best practice.
- Extend your network with public and private sector professionals within the global IPFA community.
- Produce outputs such as white papers, events or webinars.
- Work with the support of IPFA to present findings.

Recent Special Interest Groups

- Meeting the Global Energy Demands of Data Centres - **Eversheds Sutherland**
- Financing the Energy Transition in Emerging Markets: De-risking & Blended Finance Solutions - **Rothschild and Co and World Bank**
- Sustainability and the Energy Transition: Regional Priorities in Focus - **Future Leaders Network**
- AI in Financial Modelling: Opportunities & Risks - **Forvis Mazars**
- Mobilising Financing to unlock the Transition - **UK Export Finance**
- Developing a Methodology for Integrating Physical Climate Risk Insights into the Investment Lifecycle - **Equitix**
- Sustainable Aviation Fuels: Opportunities and risks for financing - **Government of Canada**
- Accelerating Net Zero: Overcoming Barriers with Government Action - **Future Leaders Network**
- Decarbonisation of Transport - maximising opportunities for the sector throughout the transition - **Ashurst**

Special Interest Groups Outputs

Maturity Assessment of Infrastructure for Net Zero

SAF - Opportunities and Risks for Investment

Accelerating Investment for Road & Rail Decarbonisation

Salient Drivers of the Battery Storage Expansion across Europe

Emerging Global Low-Carbon Ammonia Market

Facilitating the Bankability of Energy Transition Projects

Accelerating Net Zero - Overcoming Barriers with Govt Action

Coming soon!

- AI in Financial Modelling: Opportunities & Risks
- Meeting the Global Energy Demands of Data Centres
- Financing the Energy Transition in Emerging Markets: De-risking & Blended Finance Solutions
- Sustainability and the Energy Transition: Regional Priorities in Focus

“ Chairing a SIG is a great way to connect with a global network of infrastructure professionals from diverse backgrounds and disciplines. The SIGs serve as useful forum where individuals can share their knowledge and experience in advancing energy transition projects and share global perspectives on current policy and market trends.

Dennis Trigylidas (SAF SIG Lead), Senior Advisor, Energy Infrastructure, Fuels Sector
Natural Resources Canada/
Government of Canada

“ A rewarding experience that offers a unique opportunity to foster collaboration, facilitate meaningful dialogue, and build connections among infrastructure professionals. It provides a valuable platform to lead focused discussions, support shared learning, and contribute to the development of best practices and strategic insights across emerging topics.

Charlotte Whittlesea (Climate Risk SIG Lead) , Associate, ESG & Sustainability
Equitix
